Fairy Land at Beechgrove Farm

We are ending 2010 very much as we started it, frozen in at Beechgrove Farm 500 feet above sea level. Looking out over the Cotswold Countryside, as I write at my desk, it is as close as one can come to looking out on fairyland. It has been an interesting year as usual and it has been good to hear from you and to know that you continue to enjoy using A-Mia Beauty Care. It remains my aim to keep it pure and simple (where possible using local fruits and tinctures from our own herbs), scientifically combined and affordable.

Keeping A-Mia in good Condition

The pure simplicity means using the plant ingredients, with the minimum of emulsifiers and preservatives. To keep the products as fresh as possible we use an ingredient, which mimics a naturally occurring anti-microbial. It is a 2 part system combining a glucose oxidase enzyme with glucose and oxygen, which are introduced to each other at the point of production. Although these are incorporated at low percentages, they represent a very mild and effective alternative to the traditional chemicals and of course A-Mia is PARABEN FREE. A-Mia has been using this system to good effect for four years now and although it is an expensive system, it represents the uncomplicated quality that we can trust.
